

Maestro provides your innovative technology solutions

Maestro is well-known for the cabling services we provide our customers. But did you know that we offer project management and a wide variety of specialty services as well? Our national FastTrack program lets us connect with you at your convenience. Our specialty solutions are designed to provide the ultimate in protection for your business, network, and equipment.

Security and Cable Services

No matter what your cabling needs, we've got you covered. Maestro provides cabling solutions for voice, data, video, energy management, and security networks. We combine our technical expertise and the world's best products to provide you with high-performance wired or wireless cabling solutions.

National FastTrack Web Tracking

No matter where you are located in the United States, we can provide you with a Maestro PMI manager for equipment solutions that include:

- Dmarc extensions
- Voice and data cabling
- System integration
- Enterprise support services

Our managers oversee your project from start to finish to keep you from experiencing unnecessary headaches. Access our FastTrack program through our website to track the progress of your project through its completion.

Specialty Services

We offer integrated solutions to your physical and network layer needs.

- **Intrusion prevention systems and wireless security**
With solutions from TippingPoint, McAfee, Blue Coat and Fortress Technologies, we can protect your network from attacks before they even start. Stay focused on your business, not your security, with these products.
- **Mini-computer rooms**
With Liebert Technology, we can provide the ultimate in protection for your sensitive electronic equipment, all under one roof. This integrated enclosure system protects against excessive heat, poor power quality and unauthorized access.
- **Network-based security products**
Using OnSSI video surveillance equipment, we provide you with camera management, recording and archiving, and intelligent video delivery via multiple video clients. This cost-effective system has a large storage capacity and can integrate with your current surveillance system.
