

Your source for secured wireless data connectivity.

# Maestro and Tuanis Technology together for your wireless integration

Our goal is to provide a seamless wireless solution from the site survey process, through the installation process and provide ongoing support for the entire system. The process can be monitored with our web based project management tool, 'FastTrack'.

## Product Configuration

Provide, configure, and install all necessary equipment.

## Certified Installation

The site is completely installed and tested per your requirements. We work around your 'Live Date'.

## Ongoing Maintenance

Yearly contracts to support the seamless solution.

## Annual Site Survey

This will include rogue detection scans, RF interference, expanded coverage, and more.

## Site Survey

A professional team dedicated to your company will travel to each site.

## Project Design

Develop a detailed scope of work that will meet the criteria you require.

## Installation Plan

Provide estimates for a turnkey solution that will include product, labor, and travel.

## Airport Approval

We will do the leg work to get all local approvals needed to do the job.

Our real-time FastTrack project tracking system.
