

# Perimeter Security - An IP Based Video Surveillance and Management Solution

OnSSI offers the most comprehensive camera support on the market, from megapixel cameras and 360-degree recording technologies to users' existing analog equipment. This solution also includes many useful APIs for seamless integration with other industry-standard products such as Access Control, Point of Sale, and Video Content Analysis systems.

## Transitioning to OnSSI

We will help you transition from analog to a fully digital system by upgrading your existing system at your pace and within your budget. You will be able to:

- Keep your analog switch, enhance it, or go digital
- Retain and leverage all your analog investment and keyboard interfaces
- Maintain analog monitors, switch to a wide choice of digital displays, or both
- Keep analog recordings until you're ready to phase out VCR systems

4100 Perimeter Center Drive, Suite 245  
Oklahoma City, OK 73112

**W**e've partnered with On-Net Surveillance Systems, Inc. to provide an integrated approach for detection, analysis, delivery, and response for your physical location. Using this technology, we can automatically identify an incident or security breach and send notification alerts as required.

## IP Video Surveillance Management System

- Multiple site/multiple server, unlimited size
- Push video on-event via NetMatrix
- Export to AVI/Authenticated database format
- Archiving: multiple per day, to local/network
- Multi-channel audio recording
- Schedule multiple PTZ patrol sequences
- Active Directory support
- End-to-end 100% open architecture using non-proprietary hardware only
- Supports Analog, IP, and MegaPixel cameras
- MPEG-4, MJPEG, H.263, and Wavelet support
- Advanced motion detection
- Automatic smart search of motion on recorded images
- Intuitive map-driven navigation
- Alarm input, output, and access control integration
- Video export encryption to CD or DVD
- Advanced IP based control room video wall controller
