

Protect yourself. Trust your network to Maestro's intrusion prevention solutions.

# TippingPoint and Fortress: The industry leaders

In today's world, the smooth flow of information is critical to keeping a business running at its best. You demand operational efficiency along with the optimum security of intrusion prevention to stay ahead of the game.

Maestro is the only reseller that offers the top products in network security from TippingPoint and Fortress Technologies. With the industry's leading intrusion prevention system and reliable wireless security, these proactive solutions will stop attacks to your network before they even start.

## TippingPoint's Unity One

TippingPoint is the industry's leading Intrusion Prevention System (IPS) and is unrivaled in security, performance, high availability and ease-of-use. The system operates in-line in your network to block malicious and unwanted traffic while allowing good traffic to pass unimpeded.

### Your benefits:

- You won't be slowed down. The IPS optimizes the performance of good traffic by continually cleansing the network and prioritizing applications that are mission critical.
- Your IT security costs will decrease by eliminating ad-hoc patching and alert response.
- Your IT productivity and profitability will increase due to bandwidth savings and protection of your critical applications.
- Your stance is proactive. Attacks by worms, viruses, trojans, bandwidth hijacking, etc. will be stopped before any damage to your network occurs.

## Fortress Technologies

The Fortress offers a flexible, proven security platform to address the risks and vulnerabilities of wireless networking. The strongest commercially available security platform for wireless networks, the system gives you privacy, access of control and policy management through a highly scalable, centrally managed system.

Fortress offers protection for a broad range of applications, including:

- Reporting, credit and collections
- Point of sale and service
- Staff security
- Point-to-point links
- Maintenance networks
- Material handling
- Inventory control
- Warehouse logistics
- Patient information
- Corporate operations
